K. ADDITIONAL INFORMATION	highlighted. Deal will be led by Kyle Thomas, relativey new banker at DAD. But supported by their lead	ranked senior manager by average transaction size for the last three years.	RBCCM's Colorado success is a reflection of our firm's ascendance in the national senior manager rankings. While our firm has enjoyed a consistent perch among the top five negotiated senior managers nationally, 2019 was a breakthrough year for the firm, as we have assumed the #4 spot among all municipal underwriters.	Long history in Colorado, Mike Imhoff, strong recent experience with similar credits.	With our substantial capital position we are able and willing to take bonds into inventory if necessary to maintain initial pricing levels that we view as on-market. Our firm does not allow investors to dictate the interest rate that would be required to move all of the bonds to be offered.

L. FIRM COMMITMENT UNDERWRITING	Will provide firm commitment after the BPA is signed. They do highilght some MD deals where they took down bonds over last 5 years but it is rare and not their customary practice. Their lack of firm commitment UW on the Southshore deal resulted in sub optimal pricing.	As a practical matter, when we underwrite unsold balances as senior manager, we do not distribute these bonds and push liability off to the syndicate; rather, we own 100% of the bonds to ensure the orderly and controlled distribution of securities into the secondary market.	3 examples of taking down bonds in firm commitmeent	UW have authority to take down bonds after internal credit approval. Even NR deals. Takedown avg of 6% of par. Have not taken down MD bonds over last 5 years, however.	Have demonatrated ability and willingness to take down bonds. Have even contracted for it in other deals prior to signing BPA.
